Start Here - Christmas Countdown Savings

Everything in this kit, and how to open it. Two minutes, then your countdown is running.

WHAT YOU HAVE

1. Christmas-Countdown-Savings.xlsx - the countdown spreadsheet. It splits your goal across the paydays you have left, and re-splits it automatically when a payday is missed.
2. Christmas-Countdown-Checkoff (A4 + US Letter) - one printable page: a row per payday to tick off by hand.
3. This page - how to open the spreadsheet, whichever app you use.

OPEN IT IN MICROSOFT EXCEL

Just open the .xlsx file and type in the light-blue cells. Everything else calculates itself.

OPEN IT IN GOOGLE SHEETS (FREE)

1. Go to drive.google.com and sign in with any Google account.
2. Click New > File upload, and choose Christmas-Countdown-Savings.xlsx.
3. Double-click the uploaded file to open it in Google Sheets, then choose File > Make a copy - the copy is yours to edit and keep.

SELLER'S READY-MADE COPY LINK

https://docs.google.com/spreadsheets/d/1hG0QQUX3FTpiWCeE6z9tHcbEQLIJAoZGQl9wtvhc_8w/copy

If a link is shown above, open it and click "Make a copy" - it saves an editable copy to your own Google Drive.

THE ONE RULE

Set aside on payday, before the money drifts. Missed one? The sheet spreads what is left over your remaining paydays by itself - the goal never changes, only the split does. On the paper page, the same rule is written at the bottom.

PRINT THE CHECK-OFF PAGE

Print at 100% (actual size), black & white, one page. Pick the file that matches your paper - US Letter or A4.

For personal use only - please see PERSONAL_USE_LICENSE.txt in this kit. Questions? Message the shop any time.
