Start Here - Wedding Budget Planner

Everything in this kit, and how to open it. Two minutes, then your wedding budget is running.

WHAT YOU HAVE

1. Wedding-Budget-Master-Blank.xlsx - the budget workbook, blank. 8 tabs: Start Here, Overview, Category Budget, Vendor Payments, Payment Summary, Payment Schedule, Budget vs Actual, and Custom & Notes.
2. Wedding-Budget-Filled-Example-Fictional.xlsx - the same workbook filled in with a fictional wedding, so you can see the totals work before you type anything. All figures in the example are fictional.
3. Wedding-Print-Companion-A4.pdf - the 24-page print companion in A4: checklists and paper lists for the wedding.
4. Wedding-Print-Companion-Letter.pdf - the same 24-page print companion in US Letter.
5. This page - how to open the workbook, whichever app you use.

FIRST, MAKE YOUR OWN COPY

Google Sheets: use the ready-made copy link in the box below, then click "Make a copy". The copy lands in your own Google Drive, fully editable. Edit your copy, not the original.

Opened this file from Drive instead? File > Make a copy does the same thing.

No seller account is needed; using a Google Sheets online copy usually needs a Google account.

Excel: the .xlsx files in your download are already yours. If Excel says "Protected View", click "Enable Editing" at the top and start typing.

SELLER'S READY-MADE COPY LINK

https://docs.google.com/spreadsheets/d/1MHYd7mouYwUcRB0pW1xvWmTMksKnld1R/copy

Open the link above and click "Make a copy" - it saves an editable copy to your own Google Drive.

FILL IN THIS ORDER

1. Overview: enter your Total Budget and Wedding Date.
2. Overview: check the category shares. Change a share on Overview only; Category Budget follows Overview.
3. Vendor Payments: add one row per payment. Enter the vendor, category, item, amount, due date, and status (Paid or Pending).
4. Check Payment Summary, Payment Schedule, and Budget vs Actual. They calculate from your entries.

HOW THE NUMBERS WORK

Shaded cells are inputs. All other cells calculate automatically; do not type over a formula cell.

Type category names exactly as shown on Category Budget, or the sums will miss that row.

Status must be Paid or Pending. Use the dropdown in the Status column.

On Overview, Remaining means budget not yet committed to any payment. On Payment Summary, Remaining to Pay means budget not yet paid. The two numbers answer different questions.

On Payment Schedule, Days to Due counts from today; a negative number means the due date has passed. Rows appear in the order entered on Vendor Payments; enter rows in due-date order, or sort that tab by Due Date. Payment rows do not sort themselves.

On Custom & Notes you can add your own categories and a contingency reserve. Contingency is a reserve, not spending, and is not included in Paid or Pending totals.

EXAMPLE FILE

A filled example is provided separately: Wedding-Budget-Filled-Example-Fictional.xlsx. All figures in the example are fictional and only show how to fill in the sheets.

PRINT COMPANION

A 24-page print companion (A4 and Letter) comes with this workbook for checklists and paper lists. The spreadsheet calculates totals; the print pages are for paper use.

FAQ

See the FAQ section on the listing page where you got this file.

KEEP YOUR OWN COPY

Keep the file in your own Google Drive and export a backup yourself - it does not depend on a seller subscription service.

Figures you enter are your own estimates. This workbook records and totals them; it does not set prices or payment terms.
