Client Portal — Delivery Guide

Settled Days · Notion template · C012

Thank you for your purchase. This guide has your template link and the steps to copy the portal into your own Notion workspace. Keep this PDF: if the link ever stops working, message the shop and we will send a fresh one.

Your template link

https://future-collarbone-ba4.notion.site/Client-Portal-40e68485b25581498ec0c9ae10db72ab

Steps

1. Open the link. You need a free Notion account. If you do not have one, create it first at notion.so, then open the link while signed in.

2. Click Duplicate at the top right. (In some languages the button shows as an icon, or the word for “duplicate” in your language.) Choose the workspace to copy it into.

3. Wait for the copy. The portal, its three subpages (Client Page Template, Example Client Page, Setup Guide), and the Approvals database all copy in together.

4. Make it yours. Rename the portal with your studio name. Delete the example client page and the four example rows once you have seen how they work — or keep the example as a reference.

5. Add a client. Duplicate the Client Page Template, rename it with the client’s name, add their deliverables, and share that page’s link with them. They leave feedback on the page; you mirror the status in the Approvals database (Pending Review, Revision Needed, Approved, Published).

Important: the linked page is read-only. Always work in the copy inside your own workspace. Do not try to edit the shared page itself.

What you get

- Client Portal page — the home base for your client work, with the Approvals database built in.
- Client Page Template — duplicate it once per client.
- Example Client Page — Bloombox Skincare: a filled-in fictional example (Lena Morris, November Content Package, 3–30 November).
- Setup Guide: five steps from setup to inviting your first client in.
- Approvals database with four example rows, plus By Status and By Client views.

Before you start — please read

- You need your own Notion account. On the free plan, one uploaded file can be at most 5 MiB and page history covers 7 days; a single owner has no block limit, while a workspace with 2 or more members is capped at 1,000 blocks. Check Notion’s current plan terms if you work with a team or attach large files.

- The example client (Lena Morris, Bloombox Skincare) and its four deliverables are made up. Replace them with your own clients before using the portal for real work.

License — please read

- Use for your own client work: use the template for as many clients as you like.
- You may not share, resell, redistribute, or give away the template link or the template itself, in whole or in part, free or paid.
- You may not claim the template as your own work, or use it in a logo or trademark.
- The example client (Lena Morris, Bloombox Skincare) and its four deliverables are made up. Replace them with your own clients before using the portal for real work.
